# Causality, Seriousness, and Expectedness

## Completed assessment matrix — training draft

SOURCE LIMITATION: actual Vulenex reference and four source cases were unavailable; cases are explicitly constructed.

| | Causality | Method | Seriousness | Expectedness | Dechallenge | Rechallenge | Outcome | Rationale |
|---|---|---|---|---|---|---|---|---|
| | Probable | Naranjo-style | Non-serious | Expected* | Improved after stopping Vulenex | Not done | Recovered | Temporal relati |
| | Probable | Naranjo-style | Non-serious | Expected* | Improved after discontinuation and antihistamine treatment | Not done | Recovered | Temporal relati |
| ent | Probable | WHO-UMC-style | Serious — life-threatening / medically important | Unexpected* | Vulenex discontinued; emergency treatment given | Not done | Recovered | Close temporal |
| | Possible | WHO-UMC-style | Non-serious | Unexpected* | Laboratory values improved after discontinuation | Not done | Improving | Temporal relati |
